

ABSTRACT

The invention includes a method of reducing urea concentration in a subject's serum. Such a method comprises administering to the subject (*e.g.*, a mammal such as a human) a composition comprising an oligopeptide (or oligopeptides) having activity in reducing urea concentration in the subject's serum as determined by a mouse renal reperfusion test, wherein the oligopeptide comprises the sequence QGV or MTRV (SEQ ID NO:1) (*e.g.*, AQGV (SEQ ID NO:2) or MTRV (SEQ ID NO:1)).
